Maintaining and developing both internal and external tools and GUIs.

Frontend Developer, Stryda, Stockholm

AUGUST 2022 – JANUARY 2024

Managed the main product page with 100,000+ users

Oversaw the marketing site aimed at engaging organic traffic and directing users to the main product

Contributed to a comprehensive re-branding effort involving a design system and component library overhaul

Built our desktop client in Electron, a first for the company.

Built and managed several discord bots aimed to serve our community of users.

QA Developer, G-Loot, Stockholm

MAY 2021 – AUGUST 2022

Created a test suite of both unit tests and automated tests, in the process lowering the amount of incidents in production. Managed all our testing initiatives, coached other developers within testing.

QA tester, G-Loot, Stockholm

MAY 2018 – MAY 2021

Conducted user acceptance testing to ensure the system met customer requirements

Worked closely with developers to ensure that all bugs were properly addressed and resolved

Developed a comprehensive set of test cases that ensured full system coverage and identified potential bugs before release

Esports Copywriter, Znipe Esports, Stockholm

JANUARY 2017 – MAY 2018

Produced written content for event pages at Znipe

Crafted summaries highlighting key players, teams, and storylines for upcoming tournaments

Authored news articles and recaps for tournaments and events featured on Znipe.tv's website

Board Member, Phoenix Blue, Jönköping

JANUARY 2017 – PRESENT

Created and Launched the biggest Super. Smash. Bros tournament series in Sweden

Helped produce 100s of smaller Swedish esports events live to help bring their content to a wider audience

Managed social media for our broadcasts with companies such as Dreamhack, Zurich Game Show, Fantasy Basel and the Swedish Association of Esports

Education

Södra Latins Gymnasium, Stockholm

AUGUST 2014 – JUNE 2017

Test automation - Web based applications with Selenium, NFI, Stockholm

FEBRUARY 2018 – FEBRUARY 2018
